

26 May 2010

Dear Customer,

Pursuant to your recent request concerning the composition of Nonin Medical, Inc. oximeters, sensors and accessories, we are aware of the potential reactions to natural rubber latex by patients and medical personnel.

A review of Nonin's documentation and practices confirm compliance to the natural rubber latex labeling requirements. In accordance with the United States Food and Drug Administration (US FDA) regulations, labeling for natural rubber latex is not necessary, unless the product contains some amount natural rubber latex.

All oximeters and patient interface products (sensors, cables, tape, tubing, airway adapters, etc) manufactured, packaged, labeled and/or distributed by Nonin Medical, Inc. are free of natural rubber latex.

If I may provide further clarification or additional information relative to the composition of Nonin Medical, Inc. products, please contact me via telephone at 763 577 3196 or via email at kim.aves@nonin.com.

Sincerely,
Nonin Medical, Inc.
