Connectivity: SenSmart™ World-Class Interoperability

Interface with Industry-Leading Patient Data and Monitoring Systems

Nonin Medical’s SenSmart Model X-100 Universal Oximetry System is the first oximetry system to put regional oximetry, pulse oximetry and ease of use at your fingertips. Offering interface solutions to industry-leading data and monitoring systems, regional oxygen saturation (rSO₂) data flows seamlessly for clinical and research purposes.
Connectivity made simple with SenSmart™ Universal Oximetry System

- Easy data interface
- Customized solutions
- Multiple data output formats
- Full customer and technical support

The SenSmart System:

- **Highly Accurate**
  The SenSmart System’s EQUANOX™ Advance rSO₂ Sensor provides clinicians with state-of-the-art accuracy.

- **Versatile**
  The ability to use any combination of Nonin SenSmart-compatible rSO₂ sensors and/or SpO₂ sensors to monitor up to six sites on a patient.

- **Easy to Use**
  The smaller, lighter and less-intrusive SenSmart Universal Signal Processors automatically recognize and display all of your oximetry values on the SenSmart Monitor.

The SenSmart Universal Oximetry System interfaces with the following systems to provide expanded patient monitoring parameters and enhanced patient records management:
